

# Neeraj Kumar

## Software Developer

✉ neeraj.kumar.mca24@gmail.com ☎ 7321955257 📍 Bangalore 🌐 neeraj-kumar 🔄 neeraj-git-workspace

### Summary

A self-driven and technically competent **IT Fresher** with **1 year of experience** in IT industry, including software programming and system engineering in different domains/industry. Hands-on experience in designing and programming in **object-oriented** methodology.

### Education

#### Master of Computer Application

VIT Vellore

8.51 CGPA

Sep 2022 – present | Vellore, India

#### Bachelor of Computer Application

St. Xavier's College

8.04 CGPA

Jun 2017 – Aug 2020 | Ranchi, India

### Skills

**Programming Language:** Java, Python, Javascript, C++

**Database:** Oracle database, Mysql, MongoDB

**Full Stack Web Development:** HTML, CSS, Bootstrap, jQuery, Responsive Design, REST APIs, Node.js, Express.js, Spring Boot, JSON

**Data Science:** Data Mining, Machine Learning Algorithms, Soft Computing, Neural Network, Statistics, R Programming, SQL

**Other Tools and Technologies:** Jira, Postman, Jmeter, Selenium, Mathematics, Version Control with GIT and GITHUB, Agile, Scrum

### Work Experience

#### Salesqueen Software Solution

Frontend Intern

Oct 2023 – Apr 2024

- Executed the creation of interactive web application screen flows including Dashboard, Login UI, and Registration page utilizing **Javascript and jQuery**; optimized user journey resulting in a **40% increase** in user engagement metrics.
- Engineered an intuitive screen flow navigation system incorporating custom icons and clear headers, resulting in a **40% decrease** in user error rates and a **25% increase** in user retention.

#### Infosys

Test Engineer

Nov 2020 – Feb 2022

- API Testing, Performance Testing, Load Testing and Regression Testing.**
- Presentation and demonstration of product to the client.
- Leading and managing Scrum calls **reduces 30% time** to track project status.
- Team collaboration to facilitate successful project completion with **25% increase in efficiency.**

### Projects

#### MERN Task Manager 🔗

- Build the webpage to understand the working of the MERN technologies i.e; **React, Node.js, MongoDB.**
- Architected user-friendly screen flows such as Sign up, Login, and UI for logged tasks; enhanced user engagement metrics by 30% through intuitive design and seamless navigation.
- Developed the functionalities to add, update and delete tasks.

#### J.P. Morgan Software Engineering Virtual Experience on Forage

- Resolved broken files in the repository, ensuring proper functioning of the web application; swift actions led to a streamlined user experience, boosting customer satisfaction and driving a **20% increase in conversion rates.**
- Developed and implemented a live graph feature utilizing J.P. Morgan Chase's Perspective library to enhance data visualization for traders, leading to a **30% improvement in real-time data monitoring.**

#### Bookstore Recommendation System with Chatbot 🔗

Web Development

- Tech Used :- **Python, Django, Speech Recognition Library, ChatBot API, Postman**
- Deployed in Azure Cloud.
- Voice Search and Book Recommendation Available.
- Integrated Chatbot.

#### Customer Churn Prediction in Telecommunication 🔗

Machine Learning

- Applied predictive models using the **IBM customer churn data set containing data of 7500 customers**, leveraging machine learning algorithms to forecast customer churn, enabling customer retention strategies and reducing churn.
- Identified 16 major factors that affects the customer to churn.
- Conducted in-depth data analysis using machine learning techniques to predict customer churn in the telecom industry with accuracy of 90%.

### Certificates

- J.P. Morgan - Software Engineering Job Simulation 🔗
- Become a Restful API Developer 🔗
- OpenAI API: Building Assistants 🔗
- Back End Development and APIs 🔗
- Code For Life: Hackathon for Everyday Solutions
